Surface water Treatment Rule						Treatment plant/pump station:				
System Type - SW and GUI filtered systems						Trea	itment pia	nt/pump station:		
System Name:										
	PWSID#:						Ta	ble A: Combined Fil		1
					filtered systems except			it for 95%	Single day max.	
Reporting period:					conventional and direct 1 NT			5 NTU		
						Conventional and direct filtration systems < 10,000		0.5 NTU - Now 0.3 NTU - 1/14/05		5 NTU - Now 1NTU - 1/14/05
Signature:Date:						Conventional and direct filtration systems > 10,000		0.3 NTU		1 NTU
Combined Filter Turbidity Data (all systems)										
Highest turbidity measurement for the month:						Individual Filter Turbidity (Conventional and Direct filtration				
Total number of turbidity measurements for the month:						Only conventional or direct filtration systems need to do individual filter turbidity				
Turbidity limit for your system (from table A):						Was continuous monitoring conducted? No Yes				
Total number less than this limit for the month:						Were any 2 consecutive measurements?:				
Percent for the month meeting this limit:						> 0.50 NTU at the end of 4 hrs of operation No Yes				
Is this less than 95%?				☐ No	Yes	> 1 NTU for the current month			□ No	Yes
Max. single day turbidity limit (from table A):						> 1 NTU for the previous month			No	Yes
Did any samples exceed this in the month?: No Yes					> 1 NTU for the month before last			∐ No	☐ Yes	
If yes, list turbidity sample date and						> 2 NTU for the current mo			∐ No	☐ Yes
Date			Value Date reported		reported	> 2 NTU for the previous month			No No	
						Date Filter #		I turbidity measuren Value (NTU)	ments >1 NTU: Cause	
						Date	Tillel #	value (N10)	0.	ause
Disinfectant Residual at the entrance to the system (all systems)						Disinfectant Residual in the system (all systems)				
Date	Daily min.	Date	Daily min.	Date	Daily min.	a =		# of samples w/Cl ₂ re	sidual	
1		12	·	23	,	b =		# of samples where C		t HPC's are
2		13		24		C =		# of samples with Cl ₂	not detected & no	HPC
3		14		25		d =		# of samples with Cl ₂	not detected & HI	PC > 500/mL
4		15		26		e =		# of samples where C	Cl ₂ is not meas. &	HPC > 500/mL
5		16		27		V= <u>(c+d+e)</u>	x 100	current month V =		
6 7		17 18		28 29		(a+b)	V	for previous month =	□ No.	□ Vee
8		19		30		Notes:	15 \	/ > 5% for 2 months?	No	Yes
